

UNOCCUPANCY CONDITIONS

When any building insured or part of any building insured by this Policy are unattended or unoccupied for more than thirty (30) consecutive days, except for clause 2 which is applicable from the onset of the policy, it is a condition precedent to liability that,

1. all reasonable precautions are taken to ensure that the buildings are secure against entry by intruders including:-
 - i. securely locking and fastening all doors and windows;
 - ii. any letter boxes being sealed;
 - iii. setting all security and alarm protections in full operation and ensuring that the protections are in proper working order (if applicable)
2. the buildings must be inspected at least once every 72 hours by the Insured or the Insured's nominee in order to inspect the premises both internally and externally and to carry out any work necessary to maintain the above security arrangements. A record will be kept of such inspections.
3. to prevent the freezing of pipes in the winter month, all gas and electricity main supplies are to remain on when the temperature may drop below 10C for any period during the unoccupied time.
4. all gas and electricity main supplies will be shut off (except those supplies required to maintain automatic sprinkler installation, light or alarm systems which are to remain in operation for security or fire protection purposes, or to meet the requirements set out in point 3), unless there is a full time caretaker or security guard on the premises.
5. all outside water pipes need to be drained and shut off when the temperature may drop below 10C for any period during the unoccupied time.
6. all waste refuse and other disused combustible materials will be cleared from the building and removed from the premises at least once a week.
